Summary of ICR Capital LLC's Business Continuity Plan

ICR Capital LLC (the "Firm") has developed and installed a business continuity plan in the case of any business disruption that causes the Firm to have limited or no communications with its employees. Our plan anticipates two types of business disruptions: internal disruptions that affect only our Firm's ability to do business (such as a fire in our building) and external disruptions that prevent the operation of securities markets and/or other firms (such as natural disasters or acts of war).

The Firm intends to stay in business during both internal and external disruptions due to the fact that the Firm maintains offsite alternate physical locations for employees to conduct Firm related business and for the maintenance of the Firm's books and records. We anticipate that the Firm will recover from internal business disruptions within 24 hours. An outage due to an external business disruption may be longer and is beyond the control of the Firm. However, the Firm will endeavor to resume business as soon as it is possible for the Firm to establish business operations from its offsite alternate physical locations. The Firm maintains an alternate phone number for use during a business disruption; that number is 646-277-1200.

The Firm's business continuity plan specifically addresses the following areas related to Firm operations:

- Data back-up and recovery (hard copy and electronic);
- All mission critical systems;
- Procedures to test and determine the Firm's ability to do business (i.e., financial and operational assessments);
- Alternate communications between customers and the Firm;
- Alternate communications between the Firm and its employees;
- Alternate physical location of employees;
- Critical business constituent, bank, and counter-party impact;
- Regulatory reporting;
- Communications with regulators; and
- Descriptions of any relationships between third-parties and the Firm.
